Works: Kuarmunda (Rourkela) - 770039, Odisha, (India)

UTKAL MOULDINGS PVT. LTD.

► THE JOURNEY

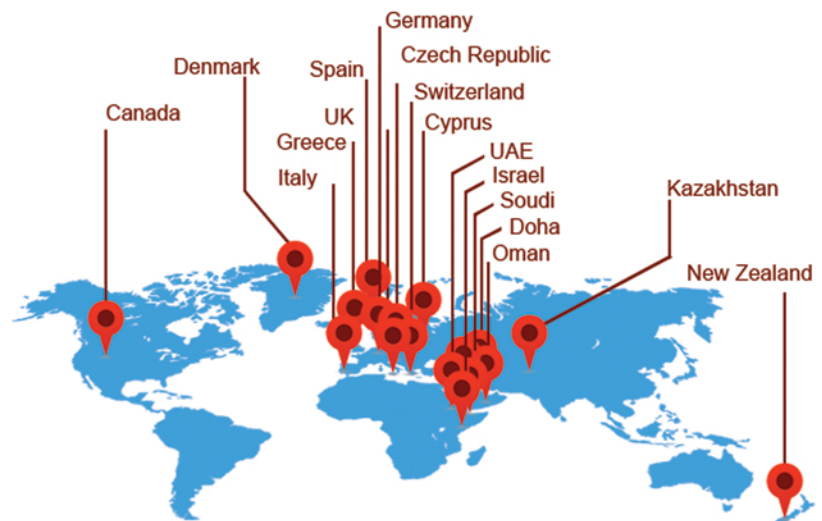

The Company, a well equipped Ferrous Foundry was established to cater the requirement of ever demanding quality castings by top class users in India mainly by Ministry of Railways and Ministry of Telecommunication. The foundry was set up in the year 1982 with a modest capacity of 1800 m. t. per annum at Rourkela (Orissa), a Steel City which is hub for Iron and Steel activities. The timely supplies and through out consistent quality casting has been its hall mark. UTKAL has, since then, never looked back and can boast of substantial expansion in its capacity to 12,000 m.t. per annum for Grey Iron Castings and additional 3600 m.t. Capacity of Ductile Iron Castings in its integrated plant located at Rourkela, Orissa. It has since 2007 started its export operations and have achieved demanded quality requirements matching international standards.

► MANUFACTURING FACILITIES

The Company has integrated Foundry Complex with all modern equipments making Grey Iron and Ductile Iron Castings. The Company is equipped with two numbers of Copula and two numbers of Induction Furnace and well equipped laboratory for chemical and physical test to monitor quality controls. The Sand Plant, Knockout, Shot Blasting, Sand Blasting and well equipped painting shop helps in maintaining quality demanded by the customers. The recent addition of ARPA-900 has helped to achieve higher standards of ever increasing quality demands.

► GLOBAL REACH

We are presently exporting our products to Germany, Cz, Cyprus, Greece, Switzerland, Spain, Italy, UK, Denmark, Israel, Canada, New Zealand, Kazakhstan, UAE, Oman, Bahrain, Saudi and Doha -Qatar.

► SPECIFICATION

The products manufactured conforms to following International Standards covering all class of products to A15, B125, C250 and D-400.
